

Catastrophe **or** chemical challenge?

Our climate is changing and research into greener solutions is vital. Industry needs adaptable, determined problem solvers to achieve this aim.

Help shape the future, use your skills to find solutions to the problems of climate change, such as:

// **alternative energy sources**

// **recyclable/biodegradable materials**

// **carbon capture and storage**

If you're looking for an exciting, technically skilled role with the opportunity to benefit the world, this may be the career path for you.

Fulfil your potential
Aim for a career in the
chemical sciences
