

# Daily routine **or** unique invention?

Research into new pharmaceutical products is happening all the time. Companies need enthusiastic and talented chemists who are excited by new challenges to undertake this multidisciplinary research.

Help solve the problems facing the world today, use your skills as a chemist to:

- // prevent, treat and cure human diseases
- // develop animal pharmaceuticals
- // develop everyday consumable products

If you're interested in organic, medicinal or biological chemistry, this may be the career path for you.

**Fulfil your potential**  
Aim for a career in the  
chemical sciences
